2016 30 Under 30: Science

28 of 31

Harbaljit Sohal, 28

Post Doctoral Scholar, Massachusetts Institute of Technology

Sohal's research is focused on engineering neural implants for the treatment of brain disorders, disability and immunodisorders. To that end, he's developed microfabrication technologies that are capable of creating small, flexible electrodes and other devices that can be more easily integrated into the body.
